

ENVIRONMENTAL POLICY STATEMENT

The company recognises the importance of continual improvement & enhanced performance and is committed to the protection of the environment and to the prevention of pollution within our environmental considerations. These will be taken into account at all stages of our pre-press, printing and finishing activities.

Within our responsibilities as a printing company is to ensure we are fully compliant with all relevant compliance obligations which relate to health, safety & the environment.

In particular the following activities will be pursued:

- a) Minimisation of harmful emissions to the atmosphere
- b) Control of noise levels below statutory requirements environment to cause the least practicable inconvenience to our neighbours
- c) Conservation of energy and natural resources used in our manufacturing and service operations
- d) Minimisation of waste in production and packaging
- e) Recycling, disposal and treatment of waste effluent by the least objectionable option
- f) Maintaining the clean and organised visual appearance of our operations
- g) Provision of safe, hygienic and attractive working environments having regard for the nature of our activities
- h) The responsible design, operation and maintenance of machinery and processes to reflect the above principles

In support of this policy are our ongoing objectives & targets. We are to consider the following when setting objectives & targets for our organisation; the context of the organisation & the planned strategic direction of our environmental management system, identified risks and opportunities, our significant environmental aspects & impacts and our compliance obligations. Objectives are to be reviewed periodically.

We shall maintain environmental standards which are regularly reviewed, audited and assessed by ourselves as well as by accredited external assessors.

This will give confidence to our customers, public, staff & other interested parties that we are a company responsible attitudes towards improving the environment in which we work and live.

The majority of the products that we produce are recyclable when they reach the end of their life with the consumer. We therefore encourage all of our clients to dispose of their products in a responsible and environmentally friendly manner by recycling the products we provide.
